

HOW YOUR ORGANISATION CAN SUPPORT US

We exist to create an equal start line for young people from a range of diverse ethnic backgrounds. Our projects help to close the opportunity gap - enabling young people from underrepresented backgrounds to have meaningful access to employers and employment opportunities. Your organisation can help us achieve our mission by:

STAFF VOLUNTEERING

- We offer Career Insight Days to young people and we need people/departments to help lend their personal career stories.
- We also need people to lend their skills and expertise to help run our organisation. From Marketing to Video Editing and IT - all skills can help us make a difference.

WORK EXPERIENCE

We're nurturing the next generation of diverse talent and that requires access to meaningful work experience opportunities. Partnering with us to either promote or help create these experiences strengthens the community aspect and diversity pipeline of your organisation.

EVENT SPACE

Our events transport young people out of their classrooms into work environments. We're always looking for office space to run our Career Insight Days and workshops.

TECH DONATIONS

We support under-funded schools by providing technology devices to help bridge the digital divide. If you have any out of cycle or old devices in working order, we can help find them a new home in schools.
